

The following diesels had **YELLOW** ends on the *long* hood: 3601, 4549, 4550, 4551, 4923, 4928  
 The following GP9s had **YELLOW** ends on the *short* hood: 4926, 4559  
 Note that the **YELLOW** end is the *front* end. All other GP9s had **GREEN** on both ends  
 (usually the long hood is to the front)

**MICROSCALE DECAL**  
 HO Scale 87-1040  
 N Scale 60-1040  
**Central Vermont Diesels**  
 (1977 - 1995)

- Black
- Green
- Yellow

(Accupaint AP-58): Entire body (as indicated in diagrams), handrails, walkways (anti-skid Black on some units), step wells.  
 (Accupaint AP-23): Portions of body (as indicated in diagrams), vertical portions of handrails from steps to first stanchion, grabirons, frame stripe on sides and ends.

**Variations:**  
 On some units, the "F" and "R" designations were changed to "F" and "B."  
 Some of the Green snowplows have a Yellow "V" (similar to that applied in Grey on some CN units).  
 Grabiron colors vary from unit to unit.

(Accupaint AP-58): Entire body (as indicated in diagrams), handrails, walkways (anti-skid Black on some units), step wells.

(Accupaint AP-23): Portions of body (as indicated in diagrams), vertical portions of handrails from steps to first stanchion, grabirons, frame stripe on sides and ends.

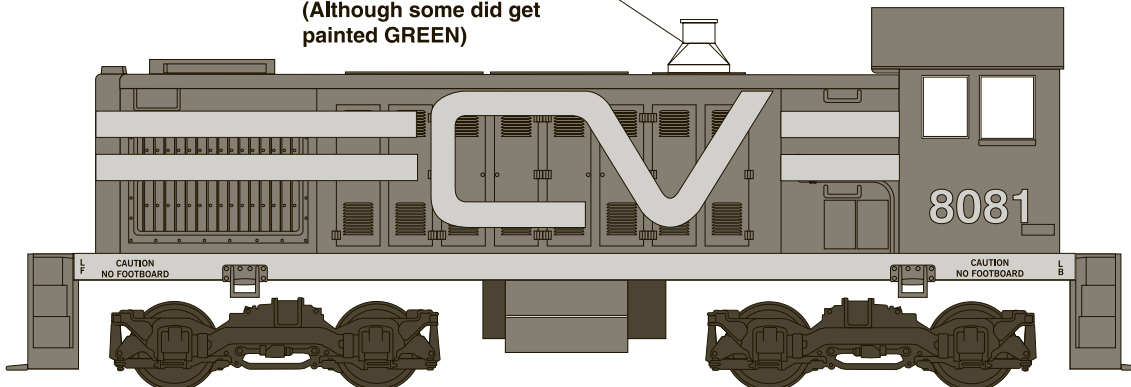

Some engines, most notably the MLW/ALCos, have White numbers on Black number boards.  
RS-11 3605 has White numbers on Black number boards, as do most of the GMD/EMD engines.

Stacks and spark arrestors are painted ALUMINUM

Stack is painted ALUMINUM (Although some did get painted GREEN)
