

We would like to thank the BNSF Railway, without whose cooperation and assistance this set would not have been possible.

BNSF Orange - Accu+ Paint 91, ModelFlex 16152, Floquil 110180, Scalecoat I 78, Scalecoat II 2078. Trucks, fuel tank, and underframe are SILVER as shown, and the remainder of carbody is BLACK; use your preferred paint brand(s) for these areas.

The scheme illustrated in the painting diagram below represents the latest version of the BNSF Railway paint scheme. Early evaluation units outshopped from GE featured a smaller nose logo, as well as two variations on the color of the logo. BNSF 7695 featured a yellow w/ black outline nose logo, while BNSF 7687 and 7701 wear a black w/ yellow outline logo. As of this writing, the standard to be adopted by BNSF will feature a larger (10' wide) black w/ yellow outline nose logo.
