

This decal set covers Pullman Standard 4750 and 2600 covered hoppers and the Trinity 2980 covered hopper operated by the CSX. Intermountain produces an accurate 4750 hopper car, Athearn produces a 2600 hopper car and Walthers produces a Trinity 2980 for using this set. You may find this set useful for other covered hoppers beyond the scope of this set. Some adjustments to the data will be necessary but is possible with the extra scale 3" numbers located above the capacity data.

MICROSCALE Decal
HO Scale 87-1311
N Scale 60-1311

CSX PS 4750 hoppers had a wide range of lettering possibilities. There were also 10" reporting marks and road numbers used on these cars presumably due to the narrower rib spacing. Other cars used 12" reporting marks and either the larger CSX logo or the smaller CSX logo. Be sure to reference photos.
