

Both Southern Pacific and Cotton Belt had ACF 1958cuft and PS 2003cuft 2 bay cement hoppers as delivered and as repainted by the SP and SSW. Due to limited space on the decal sheet and vast lettering possibilities, some of the new/shop dates are 1 up for the yellow and red versions. To effectively utilize these dates, you will need to acquire another 1390 set. The light gray heralds are for duplicating a weathering effect known as “ghosting” – This happens when the original paint wears off revealing the base color underneath. For a more detailed modeling breakdown; consult the article by T. Vanden Bosch, August 1977 Prototype Modeler. Article available online on [trainlife.com](http://trainlife.com). See URL below Paint Info. This Set Replaces 87-239, and 87-270. Use With: 87-1, 87-2, 87-462, 87-463 for additional data options.
