

The Polar Northern Railroad and the North Pole Express are fictitious and freelanced for the winter holidays. Certainly one may decide to improvise the scheme a bit to make it closer to a personal favorite railroad or add a bit more striping. The train name is also adjustable by rearranging the different words on this sheet. Colors too are suggested as such, but certainly any color could be substituted in. There are several size logos to fit a variety of steam locomotives and wooden cabooses. The drover caboose depicted is from a former MDC kit. There again one could use anything depending on preference.
