

This set will cover 53' Containers and Chassis for the Ferromex Railway. Ferromex, a member of the National American Container System, has a long-term agreement with BNSF and Honda to jointly ship time-sensitive parts between a Honda complex in Marysville, OH, and Guadalajara. The two railroads also operate joint integrated carload services at the El Paso border crossing and another auto parts shipping service. Ferromex has a new intermodal facility in Guadalajara, which can handle 20,000 containers, up from 7,000. Border crossings have become smoother through agreements and streamlining of customs procedures, but there is still progress to be made.
