

This set will cover a variety of 1st Generation (Cab and Hood) Diesels for the Rock Island. Although this set is designed for the GP7/9 and the F-series. It is possible this set has application for non-EMD locomotives including switchers. One such application is described in "Rock Island Repowered Alco Road Switcher" in the February 1980 issue of Prototype Modeler (A link is included with this instruction sheet). Using additional decal sets will help broaden the application of this sheet.

MICROSCALE Decal
HO Scale 87-361
N Scale 60-361

USE WITH: MC-4280 (ACI Labels) 87-793, and 87-794 (EMD Cab unit numberboards) 87-48 (Diesel Data)
